

MEGA Campus to Host HKIX's Satellite Site

A Strategic and Cost-effective, Satellite Site of HKIX in Town

The hosting of a satellite site, named HKIX3 site of HKIX (Hong Kong Internet eXchange) in MEGA Campus through MEGA Two with its proximity to HKIX's core sites, shall serve as the most strategic and cost-effective satellite site of HKIX in town.

HKIX3 site offers significant benefits to MEGA Campus customers who would like to connect to HKIX. Co-locating at a data centre with a local traffic exchange means enhanced performance and a one-stop solution with greater flexibility at a lower cost.

Customers within MEGA Campus can directly connect to this Satellite site of HKIX within the campus, without the need to order expensive and inflexible local loops. They can even enjoy a more resilient connection to HKIX at HKIX3 site, through its inheriting the "Ring" configuration connecting both HKIX1 site and HKIX1b site (the two core sites) simultaneously via a network along fully diversified physical fibre paths.

KEY BENEFITS

of Connecting to HKIX3 Site via MEGA Campus

- Connect to HKIX1 site and HKIX1b site on a fully diversified path, in a more cost-effective and flexible manner
- Enjoy better network performance on the local traffic exchange within MEGA Campus data centres
- One-Stop-Shop (OSS) arrangement on O&M and Fault Reporting at HKIX
