

AMAZON WEB SERVICES DIRECT CONNECT

Available in Hong Kong @ MEGA Campus

Your Expressway to Amazon Web Services

In the past, you may have concerns moving your workloads to Amazon Web Services (AWS) due to high bandwidth cost, unreliable network performance or unacceptable security risks. Through the AWS Direct Connect nodes located in iAdvantage's MEGA Campus, you can now establish a direct connection to the local AWS Direct Connect gateway, bypassing the public Internet, avoiding international transit charges, and eliminating the related security and latency challenges.

Immediate Benefits

- Reduced bandwidth costs
- Consistent network performance
- Private and secure connection to your Amazon workloads
- Lower latency
- Simple and fast Implementation

Using AWS Direct Connect @ MEGA Campus

Transfer large quantity of data between your AWS cloud and on-premises infrastructure with better and consistent network performance

Save on transit costs and take advantage of the reduced data transfer tariff offered by AWS

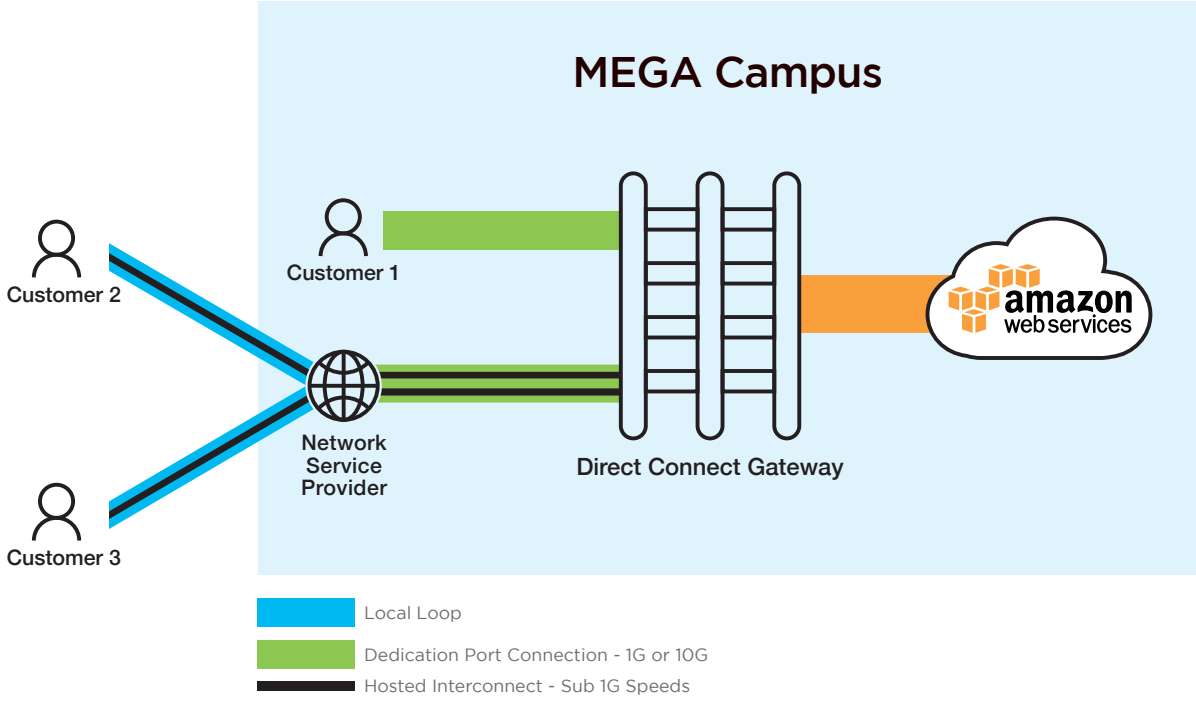

Establish private connectivity to Amazon Virtual Private Cloud (VPC) with multiple secure connections

Implement transactional applications that requires low latency between your cloud front-end and on-premises back-end

AWS Direct Connect @ MEGA Campus

Two Options for Direct Connection

- 1 You can directly order a Physical Cross Connect from your racks collocated in MEGA-i or MEGA Two (our MEGA Campus)
- 2 You can find an AWS Networking Partner who provides Direct Connect or Cloud Exchange services via Hosted Interconnect within our MEGA Campus

About MEGA Campus

We are extending our connectivity advantage from MEGA-i to other carrier neutral iAdvantage facilities including MEGA Two and MEGA Plus, forming a “MEGA Campus”. All facilities within MEGA Campus form a “Virtual Data Center” connected by high-performance fibers with full diversity. MEGA Campus enables customers to join an interconnected ecosystem with a wide array of choices.

If you are already colocating in one of our data centers, we offer a one-stop, end-to-end solution to address your direct connection needs. Contact your account manager for further details.
